Instructions to determine your estimated program cost:

Determine the length of your program. Use the estimated expenses above to determine the projected cost of attendance for the full length of time you are enrolled.

Example: 4 Year Program (8 terms) Living Off Campus 74,473+76,903+79,116+ 81,403=\$312,185 Total Estimated Cost

Disclaimer: Programs have different credit requirements and students may choose to take more than 8 terms to complete the program.

*Tuition and Fees: As the College continues to strive toward the highest level of education, increases in tuition typically occur once a year, in the fall semester. The College works to keep these increases as low as possible and has, for the past six years, successfully limited this change to the long-term rate of inflation, or 3.4%. The tuition figures above assume a 3.4% tuition increase annually.

Cost of Room and Board, and other future indirect costs may vary by student depending on your lifestyle and program. We have estimated an annual 3.4% increase in Room and Board.

Estimates of future costs and aid eligibility are subject to change based on a number of factors that cannot be reliably predicted in advance. Unforeseeable variables could result in a student's actual costs and aid eligibility being higher or lower than the program-length estimates provided.

These figures above do not include any scholarship and/or financial aid that a student might receive. Refer to the College Finance Plan on the Financial Aid Dashboard for your annual net cost after you apply for financial aid. Financial Aid is available.
